### Cleaning Sand Filter

1. Backwash filter thoroughly.
2. Remove any chlorine sticks from the skimmer basket.
3. Turn motor off.
4. Dump Kleen It and Strip Kwik into skimmer.
5. Turn motor on for a couple seconds (basically long enough to draw the cleaners down into the filter) and turn motor off again.
6. Turn valve to "Closed" and leave for at least one hour.
7. After one hour, turn valve to backwash and turn on motor. Let the water run until it's clear.
8. After the water runs clear, turn motor off and turn valve to rinse and run for 10-20 seconds.
9. After rinsing, turn motor off and turn valve to filter and turn motor on.
